DETAILED ACTION

In the preliminary amendment submitted January 10, 2002, applicant cancelled claims 1-16, 36 and 39-41. Claims 17-35, 37 and 38 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-28, drawn to a chimeric molecule comprising a viral-specific ligand and a bacterial-specific ligand, classified in class 530, subclass 391.7.
- II. Claims 29-35, drawn to a method of manufacturing a chimeric molecule, classified in class 435, subclass 69.7.
- III. Claims 37 and 38, drawn to a system of delivering a chimeric molecule to a nasal mucosa, classified in class 128, subclass 203.22.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of group I can be made by materially different methods, such as ligating the different nucleic molecules encoding the ligands into one unit, combining the different ligands with various linkers, or expressing the chimeric molecule as a fusion protein.

Art Unit: 1648

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions, operations and effects. The chimeric molecule binds to viral and bacterial ligands while the system delivers the chimeric molecule, but can be used to deliver any molecule and is not exclusive to the instant chimera.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
